Check if user(Dietician) is able to login valid endpoint and with valid email id and password in request body

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with valid emailid and password from the excel sheet "User_Login" and 0	PASSED	7.003 s
2	Then User receives 201 Ok Status with response body and successfully logs in	PASSED	0.006 s

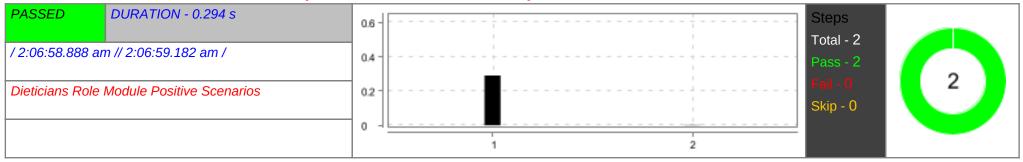

Check if user_dietician able to create a patient with valid endpoint and request body for non existing values

DETAILED SECTION -- 11 --

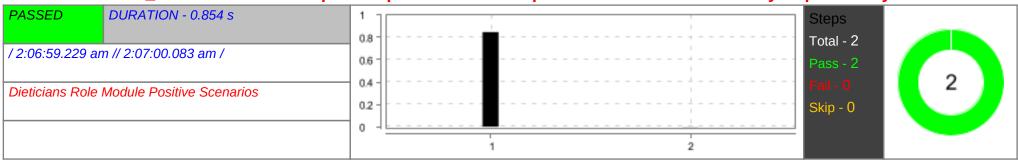

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with mandatory and additional fields to create a patient records from the	PASSED	1.323 s
	excel sheet "New_Patient" and 0		
2	Then User receives 201 Created Status with response body and patient is successfully created	PASSED	0.003 s

Check if user able to retrieve all patients with valid API Endpoint

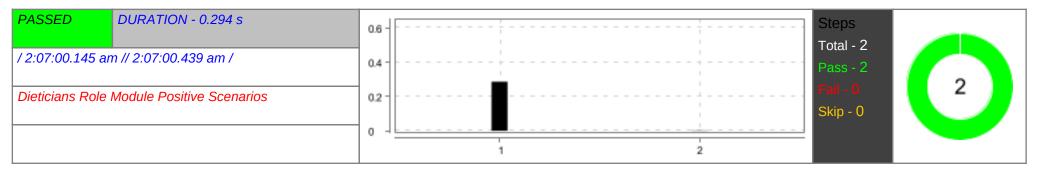

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request to retrieve all patients details	PASSED	0.291 s
2	Then User recieves 200 OK with response body	PASSED	0.002 s

Check if user_dietician is able to update a patient with valid patient details and mandatory request body

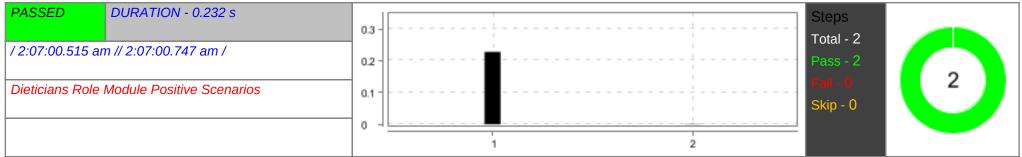

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with mandatory and additional fields to update a patient records from the		0.848 s
	excel sheet "Update_Patient" and 0		
2	Then User recieves 200 Ok with response body with response body and patient details are successfully updated	PASSED	0.002 s

Check if user able to retrieve specific patients test report with valid API Endpoint

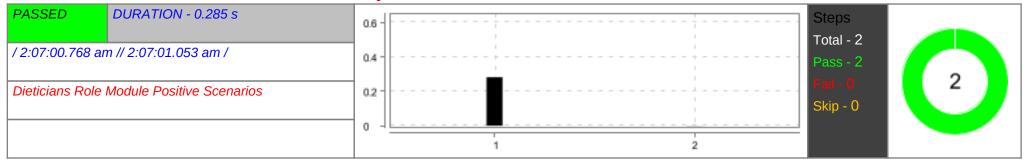

#	Step / Hook Details	Status	Duration	
1	When User sends HTTPS Request with valid patient id 0	PASSED	0.287 s	
2	Then User recieves 200 OK with patient test report details	PASSED	0.002 s	

Check if user able to retrieve specific patients test report by fileid with valid API Endpoint

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request with valid fileid "value"	PASSED	0.228 s
2	Then User recieves 200 OK with patient test report details	PASSED	0.001 s

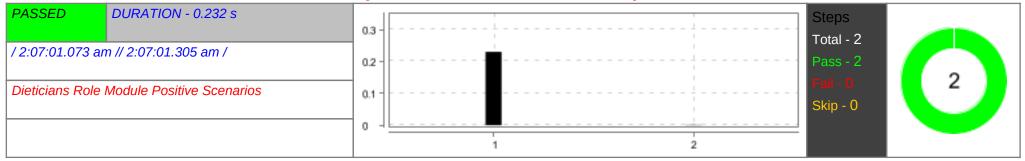

Check if user able to retrieve all morbidity information

DETAILED SECTION -- 13 --

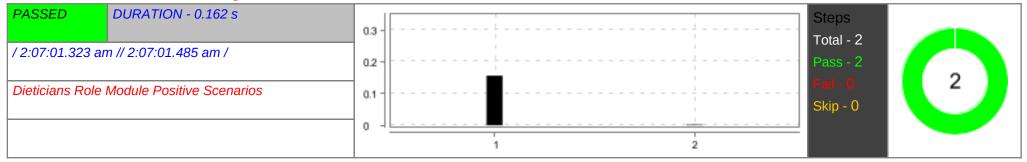

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request to retrieve all morbidity details	PASSED	0.282 s
2	Then User recieves 200 OK with response body with all morbidities	PASSED	0.001 s

Check if user able to retrieve a morbidity information with valid Morbidity TestName

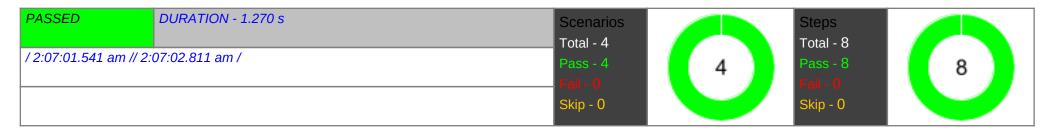

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request with morbidity test name "value"		0.230 s
2	Then User recieves 200 OK with response body with the details of morbidity test name	PASSED	0.001 s

Check if user able to logout from Dietician API

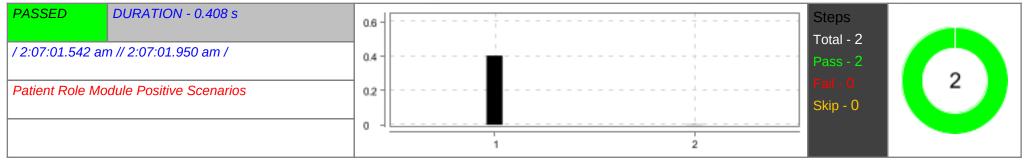

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS GET Request to logout from the Dietician API	PASSED	0.156 s
2	Then User receives 200 OK Status with response body Logout successful	PASSED	0.002 s

Patient Role Module Positive Scenarios

Check if user(Patient) is able to login valid endpoint and with valid email id and password in request body

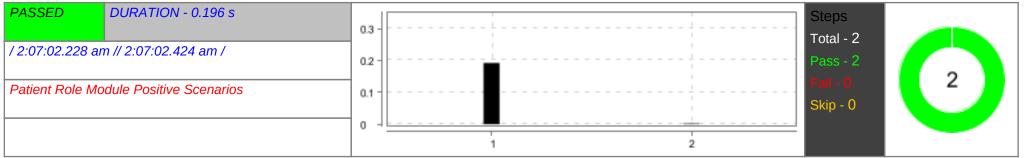

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with valid patient emailid and password from the excel sheet "User_Login" and 1		0.404 s
2	Then User receives 201 Ok Status with response body and the patient successfully logs in	PASSED	0.002 s

Check if user able to retrieve specific patients test report with valid API Endpoint

Check if user(Dietician) is able to login with invalid/blank credentials in request body

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with invalid blank emailids and passwords from the excel sheet	PASSED	0.763 s
	"Invalid_Credentials" and 0		
2	Then User receives 401 Unauthorized Status in the response body	PASSED	0.001 s

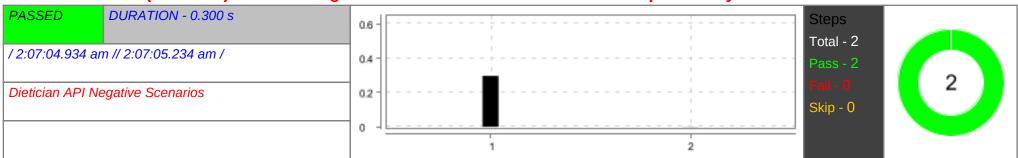

DETAILED SECTION -- 18 --

Check if user(Dietician) is able to login with invalid/blank credentials in request body

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with invalid blank emailids and passwords from the excel sheet	PASSED	0.317 s
	"Invalid_Credentials" and 1		
2	Then User receives 401 Unauthorized Status in the response body	PASSED	0.001 s

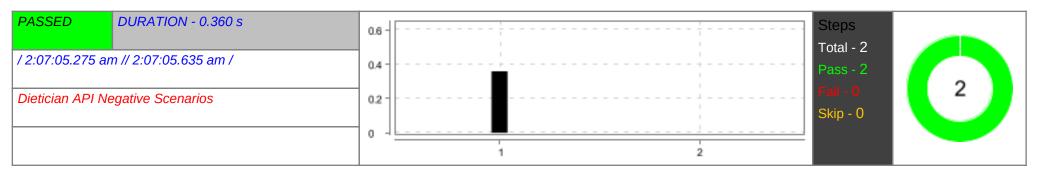

Check if user(Dietician) is able to login with invalid/blank credentials in request body

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with invalid blank emailids and passwords from the excel sheet	PASSED	0.297 s
	"Invalid_Credentials" and 2		
2	Then User receives 401 Unauthorized Status in the response body	PASSED	0.001 s

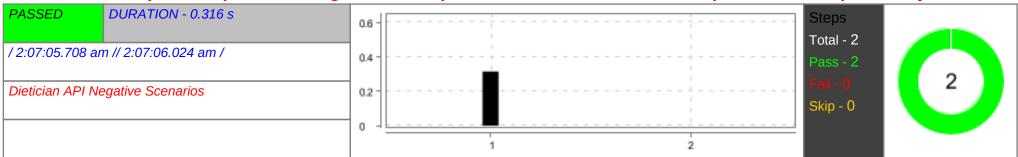

Check if user(Dietician) is able to login with invalid/blank credentials in request body

DETAILED SECTION -- 19 --

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with invalid blank emailids and passwords from the excel sheet	PASSED	0.359 s
	"Invalid_Credentials" and 3		
2	Then User receives 401 Unauthorized Status in the response body	PASSED	0.000 s

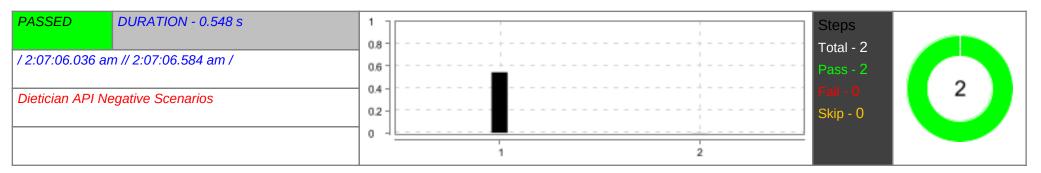

Check if user(Dietician) is able to login valid endpoint and with valid email id and password in request body

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with valid emailid and password from the excel sheet "User_Login" and 0	PASSED	0.315 s
2	Then User receives 201 Ok Status with response body and successfully logs in	PASSED	0.000 s

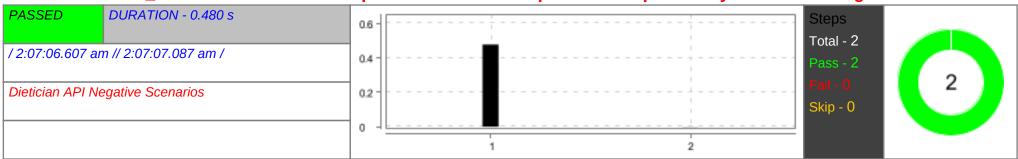

Check if user_dietician able to create a patient with valid endpoint and request body for non existing values

DETAILED SECTION -- 20 --

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body without mandatory fields tries to create a patient records from the excel	PASSED	0.544 s
	sheet "New_Patient" and 0		
2	Then User receives 400 Bad Request Status created	PASSED	0.001 s

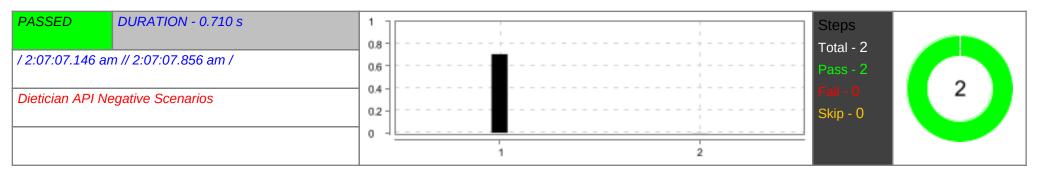

Check if user_dietician able to create a patient with valid endpoint and request body for non existing values

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body without patientinfo and attaches only the file tries to create a patient	PASSED	0.478 s
	records from the excel sheet "New_Patient" and 0		
2	Then User receives 400 Bad Request Status created and patientid is not created	PASSED	0.001 s

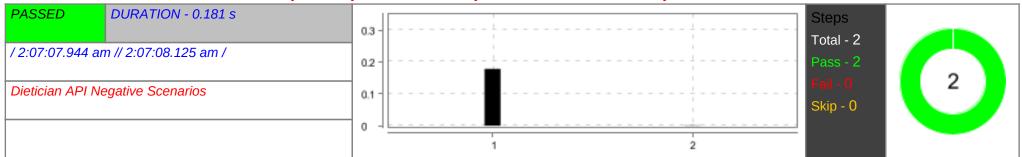

Check if user_dietician is able to update a patient with invalid patient details and mandatory request body

DETAILED SECTION -- 21 --

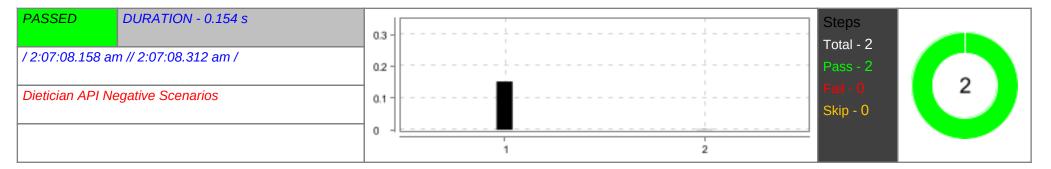

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request and request Body with mandatory and additional fields to update a patient records with	PASSED	0.707 s
	invalid patientID from the excel sheet "Update_Patient" and 0		
2	Then User recieves 400 bad request is created and update failed	PASSED	0.001 s

Check if user able to retrieve specific patients test report with valid API Endpoint

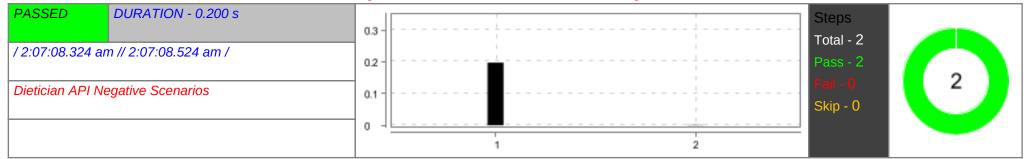

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request with invalid patient id 0	PASSED	0.178 s
2	Then User recieves 404 not found and reports failed to be displayed.	PASSED	0.001 s

Check if user able to retrieve specific patients test report by fileid with valid API Endpoint

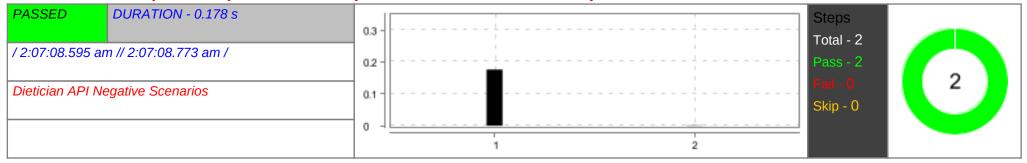

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request with invalid fileid "value"	PASSED	0.152 s
2	Then User recieves 404 not found with no patient test report details	PASSED	0.001 s

Check if user able to retrieve a morbidity information with valid Morbidity TestName

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request with invalid morbidity test name "value"	PASSED	0.197 s
2	Then User recieves 400 Bad Request with no details of morbidity test name getting displayed	PASSED	0.001 s

Check if user(Dietician) able to delete patient record with valid endpoint

DETAILED SECTION -- 23 --

#	Step / Hook Details	Status	Duration
1	When User sends HTTPS Request to delete a patient record using invalid patient 0	PASSED	0.176 s
2	Then User recieves 404 not found with response	PASSED	0.001 s
